ANNEXURE 'E' TO THE DIRECTORS' REPORT

MANAGEMENT DISCUSSION AND ANALYSIS :

The Company is having mainly three Business Divisions namely:-

- (1) Chemicals Division
- (2) Oils and Fats Division
- (3) Power Division

Division wise analysis of Industry Structure, Opportunity and Threats and Out Look are discussed hereunder for information of the members.

1. CHEMICALS DIVISION :

Under the Chemicals division mainly the products viz., Caustic Soda, Pottasium Hydroxide, Chlorine, Hydrochloric Acid etc. are manufactured. Chlorine is produced as a joint product along with Caustic Soda and Pottasium Hydroxide. Caustic Soda is used in industrial products like paper, pulp, aluminium, pvc, pharmaceuticals etc, chlorine is used in water treatment, pigments, pulp, paper, textiles etc. and Hydrochloric Acid is used in pesticides, cleaning purposes of metal etc. Potassium Hydroxide is used in the manufacture of cellulose power, magnafloc and sodium sulphate.

Basically Chlor Alkali Industry is cyclical in nature. Caustic Soda is a basic chemical and is used in almost all manufacturing processes. The performance of alkalie industry is reflected in the performance of the industry in general and also country's GDP. The Chlor Alkalie industry being power intensive, any increase in power cost and its availability would affect its performance. The commercial disposal of chlorine is the main concern for any caustic unit. To overcome this the Company has started construction of Chloromethane project. Works relating to the Chloromethane Project are in full swing. Unseasonal rains have affected salt availability in the market and as a result the cost of main raw material has gone up. So also the case with power front. To achieve optimum utilization of resources and to take advantages of market situation the company will change the product mix between Caustic Soda and Caustic Potash.

2. OILS AND FATS DIVISION :

Wide fluctuations in raw materials mainly vegetable and non-vegetable oils is the basic nature of this division. In view of the agricultural based raw materials procurement process will stress the liquidity of the Industry in general. Transportation from agricultural markets and farmers is one of the problem due uneconomic sizes in procurement. However export oriented finished goods will ease this problem. Castor oil derivatives (comprising of Hydrogenated Castor Oil, 12 Hydroxy Stearic Acid and Recinolic Acid), Fatty Acids, Soap noodles, Glycerine and bathing / toilet soap forms part of this division. The raw materials namely Castor Oil, various industrial vegetable oils and crude glycerine are highly volatile in their prices in view of this procurement of raw materials is to be planned properly. India is a leading country in exporting castor oil derivatives with abundant availability of raw material. Being a composite plant, many inputs like caustic soda, steam, Hydrogen are available internally and the same is main advantage and an opportunity for the company. During the year the market for both fatty acids and castor oil is encouraging and it is hoped that the same will prevail in future. Frequent fluctuations in Castor Oil prices is the main concern for this division.

3. POWER DIVISION:

The Power Plant at Bellary has been stopped its commercial operation due to non-renewal of Power Purchase Agreement by KPTCL. The Company is looking out at other options including sale or lease or relocation.

GENERAL-SEGMENT-WISE PERFORMANCE TOGETHER WITH DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE :

Segment-wise performance together with discussion on financial performance with respect to operational performance has been dealt with in the Directors' Report which should be treated as forming part of this Management Discussion and Analysis.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY :

The Company has established an appropriate system of internal control to ensure that there exists a proper control over all the transactions and that all its assets are properly safeguarded and not exposed to risk arising out of unauthorised use or disposal. The Internal Audit conducted at all divisions for all the key areas of business. The Internal Control System is supplemented by a programme of Internal Audits to ensure that the assets are properly accounted for and the business operations are conducted in adherence to laid down policies and procedures. The Internal Audit is oriented towards review of controls and operational improvements.

MATERIAL DEVELOPMENT IN HUMAN RESOURCES/INDUSTRIAL RELATIONS FRONT, INCLUDING NUMBER OF PEOPLE EMPLOYED :

Relations with the employees remained cordial in general throughout the year. In order to optimise the contribution of the employees to the Company's business and operations, in-house training is given to the employees to induce contribution to productivity increase and development programmes for all levels of employees have been devised. Occupational Health Safety and Environmental Management are given utmost importance. As at 31st March, 2014 the employee strength (on permanent rolls) of the Company was 1020.

CAUTIONARY STATEMENT :

Statement in this Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be 'forward-looking statements' within the meaning of applicable securities laws and regulations and such forward-looking statements involve risks and uncertainties. Actual results could differ materially from those expressed or implied.
